ABOUT US

Christie's Products was established in 2001 by Ken Christie. Ken has been making firearms accessories for close to 20 years. In the 80's he became well known to the Reising sub-gun owners for his 30 round magazines. In addition to the Reising magazines, Ken also modified the Marlin Camp 9 carbine and Ruger PC40, to accept a host of aftermarket magazines.

In 2003 Ken's son, Chance joined the company. Then together they set out manufacturing Ruger 10/22 accessories. Starting out with only a couple of products, Christie's Products now manufactures 12 accessories for the Ruger 10/22. With the Super-Stock being the largest and most intense of all the products.

In 2009 we started to expand our product line, one of the first products manufactured was a magazine loader for .22lr Ar-15 Black Dog magazines. In the summer of 2010 we unveiled our Left-hand .22lr drop-in conversion for the left-handed .556/.223 Ar-15. During the process of design and testing it we noticed a tool was needed for dis-assembly of the kit. Chance was given this task and upon completion, the tool worked so well it was decided to manufacture it. To our knowledge it is the first designed for this purpose.

At Christie's Products we take pride in the high quality of our products. Not only are they a great value they are designed to fit/install easily, and perform flawlessly. We further insure quality by insisting on American craftsmanship and materials. We believe they are the best in the world, and will stand behind that belief!

WARRANTY

While we stand behind our products not all of them are guaranteed for life. About 80% of the products manufactured by us are. All of the polymer products are guaranteed for life, other products that are deemed wear parts (example: firing pins) are covered by a limited warranty. Which makes up about 20% of all items manufactured by Christie's Products.

We carefully designed all our products to be of an outstanding value, engineered to fit and install easily and perform flawlessly. We further ensure their quality by only using American craftsmanship and materials.

Please contact us if you ever have a defective or unsatisfactory product. We will arrange for prompt return and replacement. We know our products and require no sales slip to honor our word!
